	JBL_Soundbar_21.HUI.v052	**Bar2.1 Deep Bass (Global)**

What's New

This software upgrade will:

- To improve the responsiveness of the remote control.

Instructions for software upgrade

1. Download the latest software version from JBL.com and bin file:
   - JBL_Soundbar_21.HUI.v052

2. Prepare one empty USB thumb drive (FAT32 format) and copy the file to its root directory

3. If the Soundbar is not already on, turn on the Soundbar so that the power button lights white

4. Please insert the USB thumb drive to the Soundbar USB port on its rear panel and long-press Soundbar buttons: **[POWER]** and **[VOL-]** for 10 seconds to start the software upgrade. Wait for the software upgrading to complete, and the Soundbar will go back to standby.

5. Press the power or source button to power on the Soundbar, then press and hold **the [SOURCE]** and **[VOL-]** button on Soundbar top panel for more than 10s to check the Software version.

   - After successfully upgrading, the front display would indicate " **V052**".

---THE END---
